MOST COMMON QUESTIONS

How is AxisPlus different?
For the most part, your AxisPlus card works just like a traditional debit card, with three important differences:

1. There is no PIN. When given the option between debit and credit, choose credit.
2. Use is limited to eligible merchants/ expenses as determined by the benefit account you select.
3. AxisPlus cannot be used at an ATM or for “cash back” when making a purchase.

What if I don’t have enough money in my account for a purchase?
If you know your remaining balance, a split tender transaction can occur and the difference would be paid out-of-pocket. Otherwise the transaction will be denied.

What if my doctor or daycare provider doesn’t accept MasterCard®?
You’ll need to pay with cash or check and submit a receipt to USBAflex for reimbursement.
