Daily Monitoring at Home

Most Important: Please monitor your student daily to ensure they are not sick. If they are, keep them home and contact your school.

We all have a part to play in keeping students safe this year.

School Sanitation Protocols

Students will be educated by their teachers on appropriate sanitation protocols. They will be expected to follow those protocols to help ensure the safety of their classmates, teachers, and staff. If you have questions or concerns, please discuss these with your school’s administration.

Handwashing
Frequent handwashing and sanitizing will be taught and exercised.

Hand sanitizer
Students will be invited or allowed to sanitize their hands as needed.

Gloves
Gloves will be available to teachers to assist students with masks or other necessary contact.

Sanitation Wipes
Sanitation wipes will be available in all classrooms for incidental spot sanitization.

Surface Cleaner
The district has purchased an EPA and CDC approved disinfectant cleaner that dries within five minutes and will be used between class periods and during mid-day breaks when students have left the room.

Additional Cleaning
Before and after school each day, all school building rooms, including cafeterias and common areas, will be sanitized with a chlorine-based solution. Buses will be sanitized before routes begin and after they end for the day. Playground equipment will be sanitized after use each day (personal equipment will not be allowed).
