GET YOUR LTE ON!

By now you've heard MCSD was the FIRST K-12 district in the NATION to create our own WiFi and LTE NETWORK (click here to see NBC story)

Y'ALL READY FOR THIS?

Our LTE network will cover households located inside MCSD boundaries and connect with the Chromebooks your students are using.

NO COST TO YOU!

Murray Education Foundation and CARES grants have covered the costs to give your students the same internet service they get in their classrooms at school.

Setup is easy: After picking up the hotspot, simply (1) plug it into an electrical outlet, (2) place it near a window in your home that faces the closest school building. BAM!

More Information: Click here for more information about the PowerPlay and PowerUp initiatives that are putting Murray on the cutting edge of digital learning.

Please Note: Hotspots are available on a first-come/first-served basis to any parents who would like to have one in their home.
